Edible plant? Ripe seed used as a flavouring.

Useful plant? Many medicinal uses. The seed is good for the digestive system.

Always seek advice from a professional before using a plant medicinally.

Hive bees, bumble bees, and solitary bees all need both nectar and pollen. Hive bees also need enough to make spare honey for people. For hive bees, see also leaflets from the British Beekeepers Association at www.britishbee.org.uk/information_leaflets.php. For bumble bees, see also www.bumblebeeconservationtrust.co.uk/gardening_for_bumblebees.htm. For more plants, see F.N. Howes *Plants and Beekeeping* 1979 Faber & Faber ISBN 0 571 11358 3, out of print but available second-hand For more information on edible and useful plants, see www.pfaf.org. For native plants and animals associated with them, see the Postcode Plants Database <http://www.nhm.ac.uk/fff/index.html>.
