1-2 m
2-5 m
5-10 m
> 10 m

suitable soil types:
chalk
sand
clay
well-drained
damp
wet

suitable aspects:
sunny
semi-shade
shade

Months in flower											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Months in leaf											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Edible plant? The leaves can be eaten raw or cooked but are said to be mucilaginous and bland.

Useful plant? Some uses in Chinese medicine.

Always seek advice from a professional before using a plant medicinally.

Hive bees, bumble bees, and solitary bees all need both nectar and pollen. Hive bees also need enough to make spare honey for people. For hive bees, see also leaflets from the British Beekeepers Association at www.britishbee.org.uk/information_leaflets.php. For bumble bees, see also www.bumblebeeconservationtrust.co.uk/gardening_for_bumblebees.htm. For more plants, see F.N. Howes *Plants and Beekeeping* 1979 Faber & Faber ISBN 0 571 11358 3, out of print but available second-hand. For more information on edible and useful plants, see www.pfaf.org. For native plants and animals associated with them, see the Postcode Plants Database <http://www.nhm.ac.uk/fff/index.html>.
